

Service Portal: our smartest tool ever!

With the Holmatro Service Portal, you gain access to an intelligent online system and efficient resources, helping you organize all of your hydraulic tools. Consider the possibilities:

Tool management

Insight into the location and service status of all the hydraulic tools in your organization, anywhere and at any time. Easily register and monitor your Holmatro tools as well as other brands of tools.

Maintenance and inspection management

Accurate insight into the maintenance and inspection history of all the hydraulic tools in your organization. This information helps you to timely schedule new service appointments, optimizing the deployability and reliability of your tools.

Exploded-view drawings (2D/3D) and parts lists*

Exploded view drawings are available for all Holmatro tools, facilitating repairs and maintenance and simplifying replacement part orders.

Webshop*

An integrated webshop function for ordering original Holmatro spare parts faster and easier. This function is linked to the exploded views enabling you to order the exact part you need, every time.

Documentation and information

You receive direct online access to all of the available documentation and information for each individual tool. Keeping you up-to-date with the latest user manuals, product specifications and maintenance instructions.

Service requests

An efficient way of managing service requests to your Holmatro Service Center. Requests through the Holmatro Service Portal are designed to be easy-to-use and always go directly to the right person or right department.

The tool for all your tools

 **holmatro**
mastering power

With great power comes great responsibility

Intelligent and safe control of an unprecedented quantity of power. In all conditions. That is what you want. And that is precisely what you get when you work with Holmatro tools. But with great power comes great responsibility. Optimizing the operation of your tools is crucial, requiring routine professional maintenance. To support you in this time-consuming task we developed the Holmatro Service Portal. It may very well be our smartest tool ever, saving you a considerable amount of time and energy by offering you unparalleled access to all the relevant service information you need to control unprecedented power intelligently and safely.

All the relevant service information in one place

The Holmatro Service Portal helps you put an end to misplaced or incomplete paper manuals, maintenance instructions and inspection reports. With a simple click of a button, you have all the relevant service information and documentation at your fingertips. In one central location. Creating service requests and ordering parts is also made quick and easy.

Keeping your hydraulic tools in top condition

When it comes to working safely with high pressure hydraulics, keeping your tools in optimal working condition is crucial. Routine professional maintenance of your hydraulic tool is a must. The same applies to repairs and inspections, of course. For good reason... tools kept in top condition don't only work better, but also last a lot longer!

Working together effectively with your Holmatro Service Center

Your Holmatro Service Center is the authorized party for the inspection, maintenance and repair of all your hydraulic tools. Holmatro trained service technicians work safely and expertly with the best materials, keeping your tools in top condition. They also benefit from using the Holmatro Service Portal. Once your tool is registered and you complete a service request on the portal, both of you will have access to the same current information. This approach is effective, prevents errors and creates the most optimized service experience possible.

Features

- **Web-based applications for PCs, laptops and tablets**
- **Available 24/7**
- **All the relevant service information in one place**
- **Suitable for any brand of hydraulic tools**
- **Tool registration made easy thanks to data matrix codes (also available separately)**
- **Webshop linked to exploded view drawings (2D/3D) and parts lists**
